## Lovely quilts and pillows in quality down

*Down is not only light and divinely soft, it also has an outstanding insulating capacity that keeps you warm and cosy.*

The COMCO range includes a wide variety of quilts and pillows filled with quality down and feathers. All carefully made at our production unit in Lithuania, and **OEKO-TEX® STANDARD 100** certified.

Our **DOWNPASS** certification guarantees high quality and ensures that the down and feathers used are ethically sourced and come from strictly controlled and traceable sources. The **Downafresh** label guarantees that they meet the requirements of purity and hygiene.

Our down and feather products are also **NOMITE** certified, which means they are particularly suitable for people who are allergic to house dust mites. The fabric is woven so tightly that mites cannot penetrate.

In other words, you can sleep soundly knowing that our products meet the highest health, safety and environmental standards!

COMCO's down pillows are available in a variety of styles and heights, and we can customise them to meet your specific needs. Our quilts are designed with a checkerboard pattern to distribute the down evenly, ensuring an undisturbed, comfortable night's sleep even on the coldest of nights. **Sweet dreams!**

**Downafresh**  
Hygiene according to EN 12935
